

**General Department of Inspection &
Measurement**

**World Metrology Day Celebration and
workshop**

World Metrology Day 2017

20 May

"Measurements for transportation"

21 May Raslanuf

For the fifth year the Libyan National oil Corporation celebrated The World Metrology Day . In this year the celebration and technical workshop took place in Raslanuf City at the head quarter of the General Department of Inspection and Measurement

Under the patronage of NOC, the General Department of Inspection and Measurement celebrates this occasion by holding an honoring ceremony for the pioneers who founded the oil and gas measurement operations in addition to a

workshop that includes technical presentations on various measurement techniques presented by a group of engineers at the Inspection Department on 21/05/2017 in Ras Lanuf city , the attendees were from many operating companies (AGOCO, RASCO, ZOC, HAROUGE, WAHA, LERCO,SOC) .

In order to contribute to developing the oil and gas measurement operations, NOC gives its top priority to the measurement operation in order to preserve the oil wealth by upgrading the accuracy of measurement systems and train the employees working in this field. It also abides by the application of the entire international standards which guarantee the rights of all the parties involved in the measurement operation
